HI SMILE RANGE

REDSEAL KIDS BERRY

COLGATE 0-2 BERRY

GRIN BERRY & GRAPE

FIREFLY LOL - STRAWBERRY

SOLID TOOTHPASTE, POWDER & TABLETS

Use Fluoride Toothpaste

Fluoride in toothpaste helps to prevent tooth decay by strengthening tooth enamel, helping to repair the early stages of tooth decay and disrupting the growth of bacteria that causes cavities.

The Ministry of Health recommends everyone use a fluoride toothpaste that contains at least 1000 parts per million (ppm) fluoride to help prevent tooth decay. For children who don't like the taste of mint, there are other flavoured toothpastes which contain 1000ppm fluoride.

Not Recommended

These toothpastes contain little or no fluoride. They are not as effective at preventing tooth decay compare to a toothpaste containing at least 1000ppm fluoride.
