

# SYPHILIS AIN'T IT

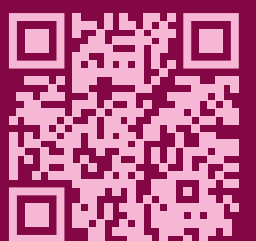

**IF YOU'RE  
PREGNANT,  
GET TESTED.**

**Syphilis is in our community.  
It can be passed on to sexual  
partners and unborn children.  
And that ain't cute.**

But detection means protection for you, your pēpi and your whānau. You may have no symptoms, but if you're pregnant or planning a pregnancy, ask for a quick blood test.

**GET TESTED.**

Ask your midwife, GP or find  
out where to get tested here:
